Creating Motion Graphics with After Effects
Volume 2: Advanced Techniques
by Trish & Chris Meyer
CMP Books • 3rd Edition • June 2005

Table of Contents

Introduction ..... **ix**
Integrating After Effects into a variety of workflows.

How to Use This Book ..... **x**
How this book is organized, typographical conventions, and what the icons mean.

DVD Roadmap **1**
The enclosed DVD is an essential companion for getting the most out of this book, including projects for most of the chapters, free plug-ins, and other goodies.

PART 1 Type, Draw, Paint

1 All About Alphas **2**
Alphas 101, background color 2
Antialiased edges 4
Alphas in After Effects 5
Alphas in Photoshop; Straight versus Premultiplied Alphas 8
Remove Color Matting; Alpha Add mode; Channel Effects 15
Rendering separate alphas; luminescent premultiplied alpha 19

2 Working with Photoshop **22**
Creating transparency in Photoshop; saving layered files 23
Importing Photoshop files, including as compositions 27
Pixel Aspect Ratios (sidebar on Photoshop PAR tags) 30
Layer Sets, Styles, and Effects; *Color Management* (sidebar) 33
Buttons for Encore DVD (sidebar on exporting files for Encore DVD) 34

2B Dots, Pixels, and Inches *(Bonus Chapter PDF on DVD)*
Scanning artwork at the correct sizes to use in After Effects.

3 Working with Illustrator **38**
Insider Illustrator, creating text, kerning, saving files, creating outlines 38
Defining the Document Size (setting the crop area, resampling) 42
Importing from Illustrator; Merging Layers 43
Importing from Illustrator as Composition; Blending Modes 44
Continuous Rasterization and render order issues 46
More Illustrator Tricks; Release to Layers 50

4 Paint and Clone **52**
Getting started, editing and managing strokes; Paint on Transparent 52
Transforming Brush strokes; Channels; Modes 56
Eraser tool; erase Paint Only and Erase Last Stroke options 58
Animating strokes; using Write On Mode, replacing strokes 60
Rotoscoping; Brush Tips and tablets; interpolating strokes; Effects and Paint 62
Clone Stamp tool; Clone Presets; Clone Source Overlay; Source Time Shift 66
Using Motion Tracking and Expressions to automate cloning 70
Random Paint Splatters: painting in a straight line, copy/pasting strokes 73

4B Vector Paint *(Bonus Chapter PDF on DVD)*
This legacy paint and rotoscoping plug-in still has its fans. Since it offers some features not supported by Paint, we demonstrate ways to use it in production.

PART 2 Animation Assistants

5 Additional Assistants **74**
Exponential Scale 74
The Wiggler 76
Keyframe Assistants from Third Parties (3D Assistants, Useful Assistants) 81
Smart Mask Interpolation 82

6 Express Yourself **86**
Creating expressions, including using the pick whip 90
Mixing and matching parameters, ranges, and dimensions 92
Controlling Expressions; Expression Language Menu 98
Building more complex expressions, including wiggle 101
Expression examples 106
Scripting Overview (sidebar on controlling After Effects with scripts) 114

6B Deeper Modes of Expression *(Bonus Chapter PDF on DVD)*
Diving deeper into the expression language.
Other useful math expressions 3
Interpolation methods 9
Deeper into arrays 11
Space conversions 16
Comp, Footage, and Layer attributes 19
Managing time 21
Making decisions, including if/then/else statements 29
Expressions for looping 35
The wiggle expression 38
Random numbers, including noise 42
Color space conversions 45
Text and expressions 48

PART 3 More on Effects

7 Professional Edition Effects Roundup 118
Adjust and Channel effects 118
Distort effects 119
Noise & Grain effects 124
Render and Stylize effects 127
A Few of our Favorite Things (sidebar on third party effects) 129
Sweet 16 (16 bit per channel mode) 132

8 Color Correction 134
Levels and Curves to improve contrast 134
Colorization adjustments and tricks 137
Adjusting color by channels, brightness, and with keying; "Instant Sex" 139
Third Party Magic (Digital Film Tools and Magic Bullet) 143
Synthetic Aperture's Color Finesse 144

9 Compound Effects 146
How compound effects work 146
Compound Blur and Texturize 148
Displacement mapping 152

10 The Blue Riders 156
Keying approaches 158
An overview of the different keying plug-ins 160
Keylight 163
Inner/Outer Key 166
Color correction and edge improvements 168

10B Color Difference Keyer *(Bonus Chapter PDF on DVD)*
How to use the most powerful of the Adobe keyers.

PART 4 Working with Audio

11 Audio Basics 172
Reading audio waveforms 172
How to spot audio 175
Controlling audio levels 176
Previewing Audio 177

12 Audio Effects 180
Trimming layers; avoiding clipping distortion 180
The workhorse Stereo Mixer effect 181
Time-based effects, including Delay, Reverb, and Flange & Chorus 182
Pitch-based effects, including equalization and creating tones 184

PART 5 Time and Tracking

13 Time Remapping 188
Overview, including creating freeze frames 188
Manipulating the speed of clips to change the action 192
Adding handle to a clip 195
Manipulating keyframed animation, sequenced layers, and frame sequences 196

14 Time Games 200
Posterize Time versus Preserve Frame Rate 200
Step-time tricks 202
Echo, Time Difference, and Time Displacement 204
Third party time-based effects, including the bundled Cycore FX 210

15 On Stable Ground 212
Overview of the motion tracker/stabilizer 212
Tracking, and applying a track 217
Masking and Motion Stabilization (sidebar on keeping masks stationary) 219
Stabilization practice 220

16 Motion Tracking 224
Tracking Position, including working with the Attach Point 224
Tracking Rotation and Scale 226
Corner Pin tracking 228
Tracking practice 229

PART 6 NLE, 3D, and Web Integration

17 Integration 101 234
An overview of managing the workflow between After Effects and other common production tools.

18 Integration with Nonlinear Editing Systems 238
Adobe Premiere Pro, including AAF 239
Media 100 i, HD, and 844/X 241
Avid systems (using Automatic Duck Pro Import AE) 245
Apple Final Cut Pro and Motion 247

19 Integration with 3D Applications 250
3D Channel Effects 250
Importing camera moves from different 3D packages 261
Creating mattes for 3D objects 276
Multilayer compositing and compositing tricks 282

20 Integration with Web Applications 288
Importing JPEGs, GIFs, and PNGs 288
Flash SWF import issues, including frame rates and alpha channels 288
Exporting SWF animations from After Effects 292
SWFing Textacy (sidebar on exporting text animations as SWF files) 293
SWF Export Options 294

PART 7 Format Issues and Rendering

21 Video Issues 296
Fields, Interlacing, and Frame Rates 296
Frame sizes and nonsquare pixels; anamorphic widescreen 298
Safe areas and colors 303
Previewing your work on a real video monitor 306

22 Playing the Field 308
Fields and interlacing explained, including deinterlacing sources 308
Rendering with fields 313
Field order problems, and how to fix them 315
Managing interlace flicker 319

23 3:2 Pulldown 324
Pulldown explained, including Advanced Pulldown 324
Removing pulldown from footage 325
Advantages of removing pulldown 327
Rendering with pulldown 329

24 Luminance and IRE Issues 330
The difference between computer and video luminance ranges 330
Converting between different luminance ranges 331
IRE and Setup issues 337
Superblack (sidebar on keying based on special luminance levels) 337
Making sure your colors are broadcast-safe 339

25 Working with D1/DV NTSC 342
Pixel aspect ratio issues 342
Dealing with square pixel sources, and working square 345
Field order and frame rate issues 348
Drop Frame versus Non-Drop timecode 349

26 Working with D1/DV PAL 350
Pixel aspect ratio issues 350
Dealing with square pixel sources, and working square 352
Field order issues 355

27 Working with Widescreen **356**
Working in high definition 356
Anamorphic widescreen standard definition video 358
Repurposing 4:3 content into a widescreen format 361
Making widescreen sources fit into 4:3 video frames 363
Designing for both widescreen and 4:3, plus faking widescreen 365

28 Working at Film Resolution **368**
Film frame sizes and framing 368
Scanning in and recording out 372
Telling Time (sidebar on feet+frames plus keycode numbers) 375
The online/offline workflow (applies to hi-def video as well) 377
Working with the Cineon file format 379

29 Prerendering and Proxies **384**
Prerendering to save time 384
Creating and applying proxies; placeholders 385
Working with proxies, including rendering 387

30 Advanced Rendering **390**
Consolidating, removing unused footage, and reducing projects 390
Collect files 391
Network rendering, including using the Watch Folder 392
GridIron X-Factor and Rush Render Queue 396

31 What's Your Preference? **398**
General preferences 398
Previews and Display preferences 400
Import and Output preferences 401
Grids, Guides, and Labels 402
Memory, Cache, and Video Previews 402
User Interface Colors 403

31B The Secret Preferences *(Bonus Chapter PDF on DVD)*
Editing the After Effects text-based preference file.

The Road Home

Bonus DVD Tutorials Overview
A number of tutorial projects are also included on this book's DVD. See summary on page **404**.

Afterword: CoSA Lives *(Bonus Chapter PDF on DVD)*
David Simons – one of the original creators of After Effects – takes us back in time to learn how this program we love came into being.
